

Nettalkvoice Callshop is a professional billing and monitoring system based on Asterisk PBX for call shops, Internet cafes, libraries, schools and any place that provide phone calls for public use

Nettalkvoice VOIP call shop solution enables people to make long distance and international phone calls at considerably lower prices as compared to the PSTN. It is a lucrative business because of the low initial business-entry investments and the stable increase in potential customer base.

- Training to get your business up and running in one to two hassle free business day.
- VoIP Phones or Gateway Devices (supplied free by Nettalkvoice)
- Internet Access

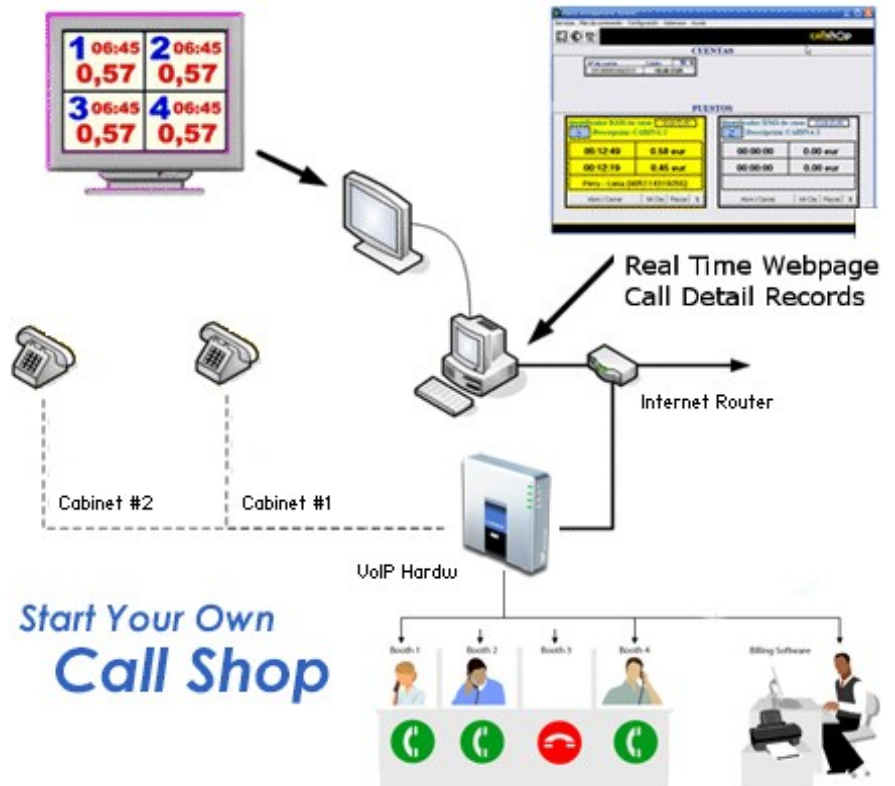

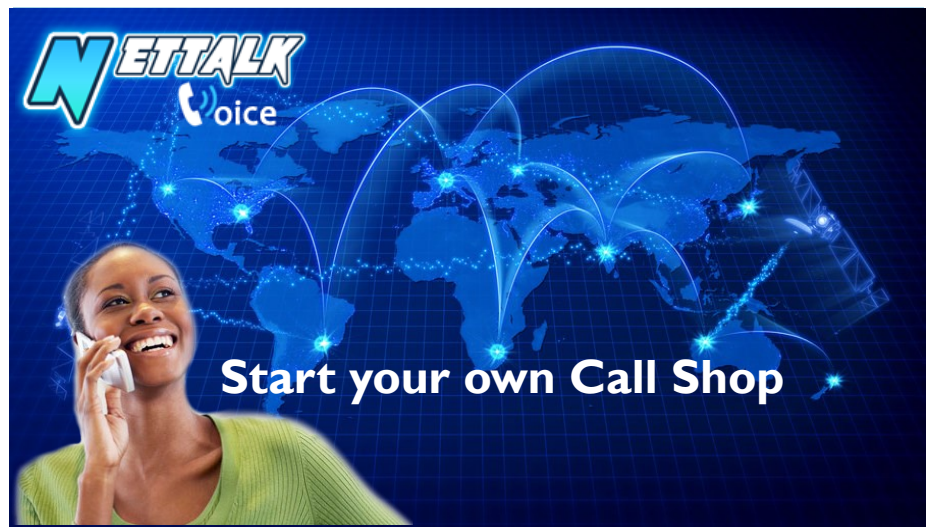

Typical Callshop Senarios:

Prepaid :

- Customer visits the Callshop.
- Customer pre-pays the operator for the call.
- The customer will go to the phone booth and dial the destination number.
- Callshop VoIP will record the call details and the corresponding call charges for future reporting needs.

Postpaid :

- Customer visits the Callshop.
- Customer chooses a vacant phone booth and dials the destination number.
- Callshop VoIP keeps track of each phone booth's call details and the corresponding call charges for invoicing and future reporting needs.
- When the customer has completed his/her calls, the operator generates an invoice for the customer's calls.

CALLING PLANS

Lets say your parents, friends or business partners reside in Paris France with a (331) area code. You would choose a phone number with the same (331) area code.

Now calls from them to you would be regarded as a local call, as if your were also in France.

- ▶ You can also call them or any other country that is in your unlimited plan.

WEBSITE MADE PRACTICAL

- ▶ Instant real-time customer service
- ▶ No computer headset needed
- ▶ No waiting to check your email
- ▶ No clumsy text chat support
- ▶ Phone to phone connection
- ▶ Receive calls on your office phone or mobile device direct from your website
